

Four times in. Your tenths out.

After you land, type your Ramp Out, Takeoff, Landing and Ramp In. ZuluFox works out air time and flight time in tenths, ready for your logbook.

The app interface displays the following information:

- LOCAL TIME:** 11:05:12
- Date/Time:** Sat, 25 Oct, UTC 1705Z
- Leg 1:** Indicated by four colored dots (green, green, orange, grey).
- Inputs:**
 - RAMP OUT:** 09:30
 - TAKEOFF:** 09:42
 - LANDING:** 0000 (highlighted with an orange border)
 - RAMP IN:** 0000
 - AIR TIME:** —
 - FLIGHT TIME:** —
- Action:** A dashed blue button at the bottom labeled "Type Landing".

Fly first, log after

Jot your times on your kneeboard. Type them in after shutdown, four digits each.

0.1

Tenths, done for you

Air time first, then flight time, with day totals across every leg.

Private and offline

No account. Your times stay on your phone, even with no signal.
